What our customers say:

"Premier has supported Prodrive's autoclaves and ovens for a number of years. They are always very quick to respond to any problems we have either on site or via remotely logging in. The service we receive is first class, as their name suggests."

Peter Smith, Operations Manager, Prodrive.

Prodrive is a technology based company operating in the motorsport and other industries.

"Premier Autoclaves engineers provide peace of mind that the machine is kept in good shape and that potentially expensive issues will be diagnosed before they happen."

Martin Cleere, Project Engineer, BAE Systems.

BAE Systems operate in industries spanning defence, aerospace, security and other industries with operations across the globe.

"Following the upgrade of our Italian autoclave by Premier Autoclaves we have seen a significant technological improvement as well as increased efficiency".

Mike Davies, Testing & Evaluation Manager, Cytec.

Cytec Materials is a Multi-national manufacturing company, active in chemicals, polymers and additives for a wide range of industries.

"Preventative maintenance is absolutely key for reliability and ensuring process parameters are in control and capable. We chose Premier Autoclaves for this service due the thorough nature of the servicing package they provide"

Garry Newton, Facility & Production Manager, CTAL.

CTAL is a joint venture between Rolls Royce and GKN Aerospace developing the manufacturing processes for aircraft and engine fan blades and cases.

"The upgrade has certainly opened a few more doors for us in terms of new customers. We know that Premier's software is used on other autoclaves that they have upgraded to Nadcap, AMS2750, Boeing and other specifications."

Richard Irons, Engineering Manager, ARRK.

ARRK Europe is one of Europe's largest product development specialist.

"Premier's knowledge and advice regarding Nadcap AMS2750E was invaluable in achieving required specifications and accreditation"

Philip Spaul, Project Manager, bf1 systems.

bf1 systems is a market leading provider of electrical, electronic and composite solutions to the motorsport, automotive, aerospace and marine Industries.
